Limitations AutoCAD may be released in a limited capacity for licensees; for example, to be able to evaluate a product for potential purchase. Because of the license restrictions, AutoCAD is not usually distributed freely. Problems with certain editions Some editions of AutoCAD have been reported to have caused problems, and have been removed from the market. Post v15 years AutoCAD 2009 will be unsupported starting with v15. Although not a common issue, because AutoCAD's UI and interface (ObjectARX) has been updated, support for older versions will be discontinued. This will also be the case with AutoCAD 2010. The current version of AutoCAD is AutoCAD R14.3. CD28 is required for allergen-induced airway inflammation in mice. Recent findings have implicated the CD28/cytotoxic T lymphocyte antigen-4 (CTLA-4) pathway in the development of Th2 responses. This study examines the role of CD28 in airway inflammation in the context of allergen-specific responses in vivo. BALB/c wild-type, CD28(-/-) and CD28(-/-)BALB/c T cell receptor (TCR) double-transgenic (Tg) mice were challenged with inhaled cockroach (CR) or alum-precipitated *Dermatophagoides pteronyssinus* (Dp) ovalbumin in the lung or skin. Responses were assessed after a single or multiple airway challenges. CD28(-/-) mice had reduced CR- and Dp-induced pulmonary and dermal inflammation. The absence of CD28 impaired the ability of CD4(+) T cells to produce IL-4, IL-5, IL-10, IFN-gamma and IL-17. The impaired development of Th2 cells was associated a1d647c40b
