create standard shortcuts · Doesn't have an interface · Doesn't have an image viewer for your desktop · Is not compatible with custom toolbars · Offers limited options for customization · Doesn't have a folder browser · Doesn't give you the option to have a toolbar as the default view · Doesn't have built-in tab grouping · Can't be installed on Edge devices · Doesn't include easy resizing of tabs · Doesn't have an option for a right-click context menu · Can't be removed from the desktop · Is just a basic app · Can't

be used to read remote folders
Google Chrome was the starting point for the creation of this software. Why? Because it offers a lot more features than other browsers. If you are looking for a browser that has the features of Google Chrome, as for example automatic download, you won't find anything as simple and streamlined as this software.

Google Chrome is a browser that can find quickly and easily everything you need to know. By that I mean anything, including

news, images, videos and documents. The browser also offers support for a variety of file formats, like formats that are typically supported by .pdf, .tiff and .avi file formats. So, if you're a person that doesn't like to dig through menus to find something, there's a quicker way to get back to the most wanted website. Just open a webpage, and a small panel will appear where you can instantly save it to your clipboard for later use. A browser that works hard to please you. The software

offers a streamlined interface. It doesn't get in your way, it doesn't ask you to choose a language. It doesn't ask you how you want your favorites organized, and it doesn't need Adobe Flash to work. A minimalist browser with powerful features. This software was the first that I tried to create and it is one of the best browsers out there. Google Chrome is a web browser without any unnecessary extras, that has a

Features

Multiple Tabs and Fold

Add as many tabs you want and rearrange them as you like. The columns automatically adjust themselves to give you a tabbed explorer. Easily close all tabs except the one you're on by using a single shortcut key, or by choosing a default tab. The little icons in the column name just tell you what they do, and you can totally modify them if you need. Added to your new tab bar. Enjoy the things you can do with QT

TabBar.
