Action of 20 April 1777 The Action of 20 April 1777 took place between the United States frigate the United States (32 guns) and the British frigate HMS Eagle (28 guns) in the Pacific Ocean. In April 1777, after America declared war on Great Britain, four British warships made their way to the north Pacific. On 20 April, they encountered the American ship United States. The British frigate, Eagle, proved victorious in the resulting action, capturing the American frigate United States. Background On 6 April 1777, Congress ordered Robert Morris, then a private citizen, to lead a naval force from the American port of New York against the British. Morris was chosen because the ship that he was commanding had once been British and because he had been a prominent merchant. He was appointed Commodore-General of the United States Navy on 25 May. The American frigate was under the command of Charles Hotham, a brigadier-general on the American side. Action Battle On April 20, the British squadron of four warships arrived off the island of San José. At 6 am, Eagle passed ahead of the Philadelphia and began firing on her from five guns. The American frigate responded by opening fire on the British ship. Although Lieutenant John Waldo was mortally wounded early in the action, his ship continued to fire for two hours until she ran out of ammunition. On the United States was Captain John Paul Jones, who was on deck despite being wounded. He survived the battle, but died of his wounds five months later. British captain John Byron brought his ship close in to make a boarding attack, but his men were shot down before he could complete the maneuver. After the British suffered heavy casualties, their ships had too much damage to continue the action. Aftermath On April 23, Byron agreed to surrender, and
