► **Endless Battle Multiple Characters Matching** The action of the game continues while you are on the go. There is no abrupt end in the game, so you are not forced to wait. There is no change in the action as there is when you change the game contents, or if you switch to another menu. With this, you can enjoy a high level of action without having to wait. ► **Strong Adaptability and Imaginative World Exploration System** To prevent the action from breaking, we added a special blocking system to make sure that you can smoothly explore the game contents in an endless battle. The growth of the Blocker is linked with the growth of the players' strength. This allows you to make use of strong play techniques, which are essential to the game, as you grow stronger. We have also implemented a system to allow more of the game to be playable while increasing the speed of the play. We can clearly understand from the results of testing that such measures improve the player's experience and reduce the sense of fatigue. ► **Realistic and Intimate Multiplayer Supported** We have created a real network environment to allow the maximum number of players to participate in the game, including displaying the name of the character on the screen. We also modified the game content so that you can feel the presence of other players as if you were playing with them. During battle, you can hear their voice as well as their actions, so you can share your thoughts about them, and their thoughts about you. The friend system is designed so that each player can feel the presence of another player, so the player can easily empathize with one another while playing the game. ► **Comfortable Equipment and Items-Based Battle Experience** It has been challenging to develop an online system for an action game, since most people who play action games use their own equipment, such as swords, so it is necessary to take the combat environment into account when building the game system. In addition to the equipment-based battle system in the game, it has been designed so that you can freely change your equipment and items by equipping them to your character, depending on the scenario. ► **Ability to Play Realistic Action Game with Team Play!** The purpose of the team play is to allow more players to play the game. We strengthened the game so that you can enjoy a more intense and involved game by teaming up with the other players. This Team

What's new:

- **Dialogues between the Characters** To understand what your character thinks and why you want to do as you do, you can freely hear dialogues between your character and the other characters around him/her.
- **Open-ended Battle System** A battle system that allows you to freely attack any enemy to gain experience and items. The battle system is designed so that you can specialize in a certain field from the very beginning, such as attack, defense, and magic, and develop your skill as you progress.
- **Ability Skills** The system in which attributes increase with certain characters becomes a player deciding factor. Define your character's abilities by completing quests in the Lands Between.
- **Easy-to-Play, Hard-to-Master Fantasy Action RPG** All the desires of the players can be satisfied through various systems in this fantasy action RPG. Whether a typeless character or a character who performs magic, you can enjoy creating your own in-game characteristic to become a hero.
