Photoshop's default version, version CS3, is the latest and the most stable version. Although version CS3 is available for Windows as well as Macintosh computers, there are several advanced features that are exclusive to the Macintosh version of Photoshop. It also has some interface differences from the version used by Windows users. I describe the interface differences as they occur in this chapter, so that you are prepared to get the most out of your editing experience. To continue reading this chapter, you may need to read Photoshop CS3 For Dummies, found at www.dummies.com/go/photoshopcs3fnd. Table 2-1 describes some of the key differences between Photoshop CS4 and earlier versions. Table 2-1 New Features in Photoshop CS4 Feature | Description --- | --- Cropping | With the Crop tool, you can change the size of a photo as well as crop portions of a photo to change its shape. Adjust the brightness and contrast | In the Adjust panel, you can make adjustments to the overall brightness and contrast of the photo. New features for image editing | The Liquify filter allows you to bend an image to your liking. You can change the appearance of the image by making it transparent, by splitting it, and by erasing areas. Add various filters, including a variety of sepia, gold, and other vintage filter effects. Add the ability to easily create 3D objects. Create professional-quality web graphics, including backgrounds for web and print pages. Create and edit layers. Layers are important to the way you can edit your images. For example, a person's face may be located in the photo on its own layer, while other parts of the image may be on a different layer. When you make changes to the photo, you can see the changes you made without making the entire image visible. You can combine multiple layers by using several layers on a single image. When you use the Lasso tool, it creates a selection of the image and enables you to edit that selection. Resize and rotate images to make them fit into a desired shape or size. Add gradient and color effects to objects. Work with various artistic effects (dip, refract, emboss, and so on). Manage the Effects and other panels in Photoshop. The Effect panel displays a wide variety of effects you can apply to your image; you can

592 S.E.2d 656 (2004) 268 Ga. App. 624 In the Interest of M.F. et al., children. No. A03A2707. Court of Appeals of Georgia. February 18, 2004. *657 James W. Smith, Jonesboro, for Appellant. Thurbert E. Baker, Atty. Gen., Shalen S. Nelson, Senior Asst. Atty. Gen., Charissa A. Beck, Asst. Atty. Gen., Crawford L. Griffin, Elizabeth R. James, for Appellee. MIKELL, Judge. Overturned on appeal, the judgment of the Juvenile Court of Cobb County adjudicating two children dependent children is reversed and the case is remanded. On August 27, 2001, the State filed a petition, through its attorney, to obtain the involuntary commitment of the children.[1] The petition alleged that the children had been abused and neglected by their mother due to inadequate shelter, poor nutrition, and a lack of medical care for her and the children. Although the petition was not verified, the allegations therein were verified by an affidavit of Patricia Fields on August 29, 2001. The children and their mother appeared before a judicial officer on August 29, 2001, and August 31, 2001. The mother admitted the allegations of abuse and neglect. In addition, the children were adjudicated dependent under OCGA § 15-11-2(8)(A). OCGA § 15-11-2(8)(A) defines a dependent child as one who "[i]s without proper parental care or control, subsistence, education as required by law, or other care or control necessary for the child's physical, mental, or emotional health, or morals, and the deprivation is not due primarily to the lack of financial means of the child's parents, guardian, or other custodian." [2] The mother now appeals the juvenile court's order, arguing, among other things, that the State failed to prove that the children were deprived. OCGA § 15-11-2(8)(A) provides that, "[i]n order for a child to be declared a dependent child, a finding of parental abuse or neglect or parental incompetence as defined in [certain other sections of] this article is not required." [3] The mother contends that the evidence was insufficient to establish that her children were deprived. When the sufficiency of evidence in a juvenile

Q: Particle plugin with GLM GUI not loading I have downloaded the latest version of the particles plugin, which is 0.8.5, and I am trying to load it into the GLM GUI. I did that according to the guide found here. All I need is to see some random particles flying around. Therefore I put in the following code into the appropriate plugins/file. This code just contains a simple for loop and a pop-up window for each particle. But nothing happens. import math import random from OpenGL.GL import * import OpenGL.GLU as glu from OpenGL.GLU import * def init(): try: glMatrixMode(GL_PROJECTION) glLoadIdentity() except: pass glu.glMatrixMode(GL_PROJECTION) glu.glLoadIdentity() width, height = 1600, 900 glViewport(0, 0, width, height) glClearColor(0.0, 0.0, 0.0, 0.0) glEnable(GL_DEPTH_TEST) glu.gluPerspective(45.0, float(width)/float(height), 0.1, 100.0) u_light = 1.0 glEnable(GL_LIGHTING) glEnable(GL_LIGHT0) glEnable(GL_NORMALIZE) glEnable(GL_BLEND) glLightfv(GL_LIGHT0, GL_AMBIENT, [u_light, u_light, u_light, 1.0]) glLightfv(GL_LIGHT0, GL_DIFFUSE, [u_light, u_light, u_light, 1.0]) glLightfv(GL_LIGHT0, GL_SPECULAR, [u_light, u_light, u_light, 1.0]) glLightfv(GL_LIGHT0,
