CheckIMEI X64 (Final 2022)

CheckIMEI is a light application that wants to help users gather information about their mobile phones. As opposed to many other similar tools that have a reputation for clunky interfaces and unnecessary extras, CheckIMEI is, in fact, an extremely intuitive application. It doesn't have a plethora of unnecessary settings nor multiple tabs. Instead, the interface is very simple, yet still has all the necessary tools for users to do their jobs. When it comes to features, there are 4 main tabs to be found in the application, as it follows: IMEI (International Mobile Equipment Identity): Provides users with a list of all the IMEI numbers known to CheckIMEI. This is a great tool for network providers that want to track down a mobile phone remotely or to find it if it's lost. Scan for network: Lets the user perform a network scan for a mobile phone by entering its IMEI number. Memory cards: Allows users to check their memory cards by pressing a button in the given dialog. Memory cards works as follows: If you have a memory card with more than 100MB of data, the application will ask you to enter the IMEI number. If not, the program will simply select the memory card from the list, which is a lot more convenient. Then you will be prompted for the number that you want to check. Now, you can press the button to see what type of data is stored on the card. After you've performed a memory card check, the application will also display a list of files inside the memory card that can be accessed. Features: ✔ You can check your IMEI number and its current network ✔ Memory cards checker ✔ Check the IMEI code of a phone ✔ Test a phone's memory card ✔ Provides basic data about a mobile phone ✔ Detailed manual is available ✔ No extra files on the desktop ✔ Compatible with most mobile phones ✔ Own IMEI number, EMEI, ESMEI and EIN (EU) stored in the database ✔ Application database is compatible with all major desktop database application ✔ No random deletion of files ✔ Can run the program from the desktop ✔ High speed and stable ✔ Free ✔ Locks the network of the mobile phone, and does not allow it to connect to a network again ✔ Internet
