The Human Empire is at war. Drifting out of the darkness of space, crusaders attack the enemy from every direction. Defend against countless numbers and all-out attacks. Build your military force and obliterate your enemies. Strategically manage your resources to move your forces and your army towards victory. Every soldier is your comrade. Play as one of ten diverse characters and help the war effort. When the world's fate rests in your hands, your mission is clear: defend it at all costs. KEY FEATURES Classic Arcade-style gameplay Players can deploy up to six different soldier characters at the same time A variety of units to protect the fragile strategic base Addition of Support Units, such as Jump Troopers, Scout Troopers, Advanced Mortar, Direct Contact Ambushers, and more Many different powerful weapons and options for each unit The combat will not be easy Every unit has its weakness, but also very useful at certain times Siege units become available with the research tree New game modes like Death Match Valor Points, Iron Pay and more Engage in PvP battles with random or AI opponents Save your progress online Setup your desired challenge level in-game REQUIREMENTS Supported with RAVEN It does not support all browsers and ICS. But, if you have a PC capable to run the game, and know how to setup the connection, you will be able to enjoy the game. Developer: CloudYard, Inc. Publisher: Piko Interactive Website: www.cloudyardgames.com Available on: PC, Mac and Linux 3565 Play as a combine of a farmer and a wizard; grow crops, plant trees, mine for resources, trade for new ingredients, and summon magical powers. Farms are your base, and will expand as you collect ingredients, train your workers, and unlock new skills and abilities. As you progress through the game, you'll find the mysterious ruins of a Dragon Castle to explore. Craft and explore your way through the castle to unlock new secrets and powerful armor. The gameplay is comprised of four core areas: Farms Battle Castle Trade & Quest Farm Grow your own crops or mine for food as you turn the barren Wasteland into a lush farm. Work on the crops and farm animals as you make them bigger and stronger to stand against the attacks of Wasteland monsters. With the help of your friends, grow and defend your farm

Features Key:

Fight in a War of Samurai, demons and humans
Gorgeous 3D Graphics
Variety of weapon kit
Great class system
Joust Battle from the Witch hunt!
Race against Friend or Enemy

_INFO7_Q: Is it possible to assign to an inline boost::lambda? Boost contains an interesting little feature that appears to make summing a collection of numbers much easier. This is done using a simple C++11 lambda as an iterator for a regular container. #include #include #include int main() { std::vector numbers; numbers.push_back(1); numbers.push_back(2); numbers.push_back(3); numbers.push_back(4); numbers.push_back(5); numbers.push_back(6); numbers.push_back(7); numbers.push_back(8); numbers.push_back(9); numbers.push_back(10); double sum = boost::lambda::lambda_adapted(0)(numbers.begin(), numbers.end()); std::cout
