mo'ne davis of women's basketball earned the first-ever san jose athletic conference player of the year award, while fellow san jose athletic conference sixth man of the year jd trahan joined her on the all-academic second team. these accomplishments resulted in davis earning a spot on the conference honor roll and an honorable mention selection for the mountain pacific sports federation all-conference first team. senior brittany morris of men's swimming, who is ranked at no. 2 in the country in the 50 free, was named the san jose athletic conference swimmer of the week. freshman tori lemon of women's swimming and senior morgan osterman of women's diving were also named to the sjac all-academic team. overall, the 2020 atlantic hurricane season has been one of the most active on record, and is poised to break the previous 11-year high by storm counts. the number of hurricanes, tropical storms, and major hurricanes increased in 2020, reflected in the record size of the 2020 atlantic season. based on the models, forecasters expect it to be another very active season, and have set the chance of a major hurricane impacting the u.s. coast at somewhere between 40 percent and 60 percent. summertime all over the world can be a dangerous time because of heat waves, he said. to the north, through the end of august, temperatures were above average in a large portion of the western united states. the mid-level ridge that brought tropical moisture and storms and heat to the u.s. northeast slowed during july, and the jet stream shifted to favor the pacific northwest and eastern u. and canada.

Breaking Bad Season 3 720p 661

noaas outlook reflects steady, if slightly less active, conditions for tropical cyclone formation in the atlantic and western pacific basins. in the atlantic, tropical activity is expected to be low, although such an outlook has inherent uncertainty due to a high likelihood of tropical development in a given season. noaas outlook also highlights the low likelihood for a major hurricane landfall in the atlantic basin this year. noaas outlook maintains its confidence in its above-normal outlook, and this outlook reflects a greater than normal seasonal hurricane potential in 2020. the following areas have been identified as coastal zones at an increased risk from destructive hurricanes, tropical storms, and tropical storms and hurricanes. noaas outlook notes that the tropics remains an active area of hurricane formation, and that there is some uncertainty regarding tropical development in 2020. noaas outlook also indicates that the likelihood of a major hurricane landfall in the united states has increased slightly. noaas outlook for tropical cyclone formation in the atlantic and pacific basins continues to reflect a high likelihood of activity in each basin, with the potential for a higher than normal number of storms. even with the likelihood of the forecast becoming too conservative, the action is expected to be quieter than in prior seasons. however, the potential remains for an active season; the entire atlantic basin could experience above-normal conditions. noaas latest outlook reflects the likelihood of above-normal conditions this year for atlantic basin tropical cyclones. this outlook also reflects above-normal conditions over the western and eastern pacific basins. consistent with its previous outlooks, noaas outlook continues to reflect a reduced likelihood of major hurricanes impacting the u.s. 5ec8ef588b
