Flicker Free uses optical flow algorithms (whats used for retiming footage) to detect and delineate independently moving objects, even in the presence of camera motion. For shots with a moving camera or a lot of movement in the video, these integrated motion-estimation algorithms are highly effective for repairing poor quality video or footage that was previously unfixable. Features Remove flicker. Change the speed of the video to remove flicker or add a custom speed. Separate frames from your video to use motion compensation. Choose from different motion compensation presets depending on the type of content or footage you have. Features Remove flicker, blue screen, and spiky artifacts from your video. Use motion compensation to improve the quality of your video Separate frames to use motion compensation Save time with advanced settings If you ever find yourself locked out of your footage, never fear. Now it is possible to repair footage that has the dreaded blue screen error. Flicker Free 2.0 is able to remove the blue screen error and now your videos can be used again! The latest version of Flicker Free includes a new feature that is not found in the basic version. Motion compensation will improve the quality of your video, no matter how long it is. If you ever find yourself locked out of your footage, never fear! Now it is possible to repair footage that has the dreaded blue screen error. Flicker Free 2.0 is able to remove the blue screen error and now your videos can be used again!

full disclosure: i am the owner of digital anarchy, and while i would like nothing more than to be able to offer this plugin for free to everyone, i don't have the time to dedicate to developing plugins. the only way i can offer the plugin at a cost is to have a small team dedicated to developing it. if you find the plugin useful, and would like to support me and the other developers on the team, then please consider patreon. the flicker free plugin offers a fast, easy and effective way to remove flicker and other common video problems caused by lights and cameras being out of sync. however, it's always best to set up a proper timing system so that you don't have to use it, and that's where we'll begin. this software works on the latest versions of windows, mac os x, linux and ios. flicker free is 100% royalty free and available at no cost. the latest release is for windows, mac and linux. it can be used as a plug-in for a number of different video editing applications and includes presets for 10 of the most popular editing software packages. the software is compatible with the latest versions of adobe premiere, adobe after effects, adobe media encoder, adobe photoshop, davinci resolve, davinci resolve studio, fcp, fcp studio, avid media composer, adobe premiere pro, adobe after effects, adobe audition, apple final cut pro, apple motion and apple compressor. whats cool:simple, easily applied plug-in is supported by all major editing platforms; flicker free utilizes series of presets suitable for most situations, including time-lapse, slow motion, super slow motion, computer monitor, tv, rolling bands from led lighting, and old archival footage. 5ec8ef588b
