The only thing, I think, that Nabokov is right about is the exciting, the paroxystic form of the novel. He even describes the Paroxysm of excitement in Lolita as a kind of aesthetic plunge. Pleasure is a kind of plunge. Laughter is a plunge. What does the plunge mean? It means ultimately beyond the linguistic meaning. I take the plunge. A thousand plunges, a million, if they dont work. This is what it means. These are the liberties one takes with language if one is going to write a real novel. Thats his great beginning. Thinks you wAs thinking of that night on the verandah that we were both

thinking of so much, Lolita and I. That single unforgettable night that was to be the eternal beginning of our love. Our lips met, clung together. A shudder ran through her lithe young body. Then, a sigh, deep down inside her. She stopped. I could feel the beating of her heart. The house was very still. I drew her toward me, her cold lips soft against mine, my hands roaming over her lithe young body. I pressed her close to me and felt her heaving breath against my own cheek. My hands left her sides and wandered lower over her supple young body. At my touch, she sighed again and a long shudder ran through her. She made no effort to resist me. Her soft young body seemed in danger of melting away in my arms. Yes, she was very, very cold. He has a couple of ways of writing these kinds of sentences that he wants us to. One is by making every effect so specific that you can almost feel the heaviness of his awareness of the nature of these sounds. I m in danger of melting away in your arms This isn t the most, um,

sonorous sentence you will ever read. It's all on one note. You can really feel it. He has this kind of physical awareness of these kinds of events that you could almost feel them happening and he makes you believe that by making it more specific. You can almost feel Lolita's breath against your cheek. You can almost feel her sigh.

### **Lolita Color Special 5**

it is important to know how colors work before you make changes. the best way to understand how colors work is to think of the color as an amount of black. black is the darkest color. white is the lightest. you can make a palette like the one in the image below by using a paint program like photoshop. simply select a color and add some black in. then, you can make it a different shade by adding black to the other end of the color. you should see the effect you want in the palette. lolita color special 5 is an eye-catching and alluring seductive
